## THE BALLAST GROUND at QUEBEC

*Two Beacons are Erected on the South side of the River, over Charles Cove on the Hill, in one with each other, and the Block House on Cape Diamond bearing NW & SE. They must be open to the Westward and as near that shore as safety will admit before the Ballast can be hove overboard.*

Form of the Buoys: this is 10 feet by 7.

*J. Lambly H. M.*

100 feet extreme Ground Chain,  $\frac{1}{2}$  iron — Anchors 3 Cwt. each.

*Original mode of Mooring the Buoys, from 1808 to 1815*

*They are Moored now with a Stone of 25 to 14 Cwt. as their size dictates; and no Ground Chain — only 10 fathoms Chain 1816.*

*Published as the Act directs by John Lambly 13 May 1818.*

*J. Walker, Sculptor.*

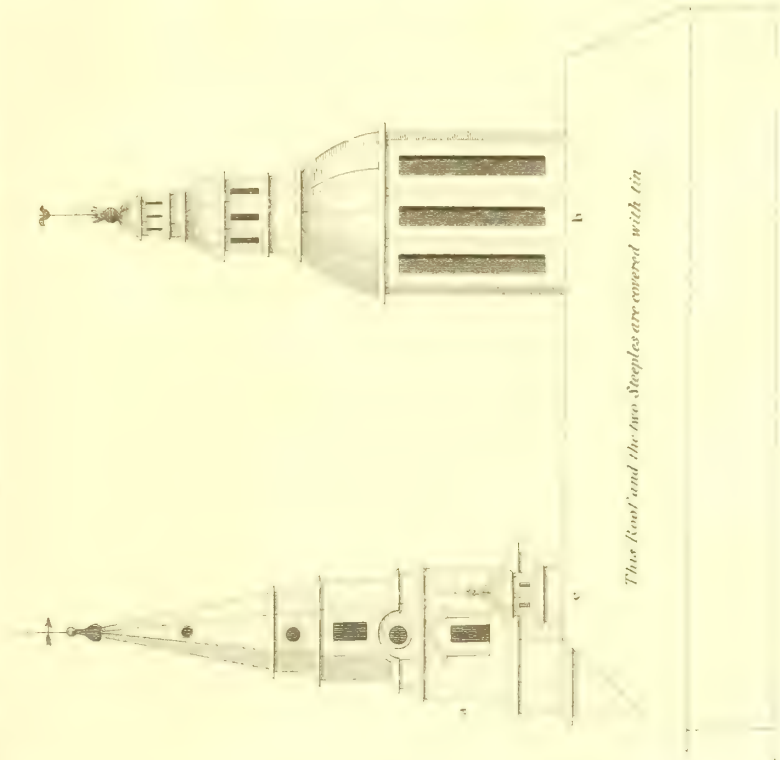

# N<sup>T</sup> ROCK'S CHURCH and ROAD.

These Hills are 6 leagues from the Church, and 1/2 mile from the Church to the first Mill.  
The Church is close to the water.

Thus appears S<sup>t</sup> Rock's Church and Road when at the Buoy bearing SE by S  
and parsonage house, just open to the westward of it, one window in sight,  
3 miles distant and small wood close to the steeple and immediately under  
the highest Mountain.  
Fences of the fields are all picked out about 6 feet above the ground and the  
square ditches represent fields.

Thwart Mark for the Buoy  
The two buoys will always lay  
NW by W and SE by E of each other  
1 1/2 mile distant.

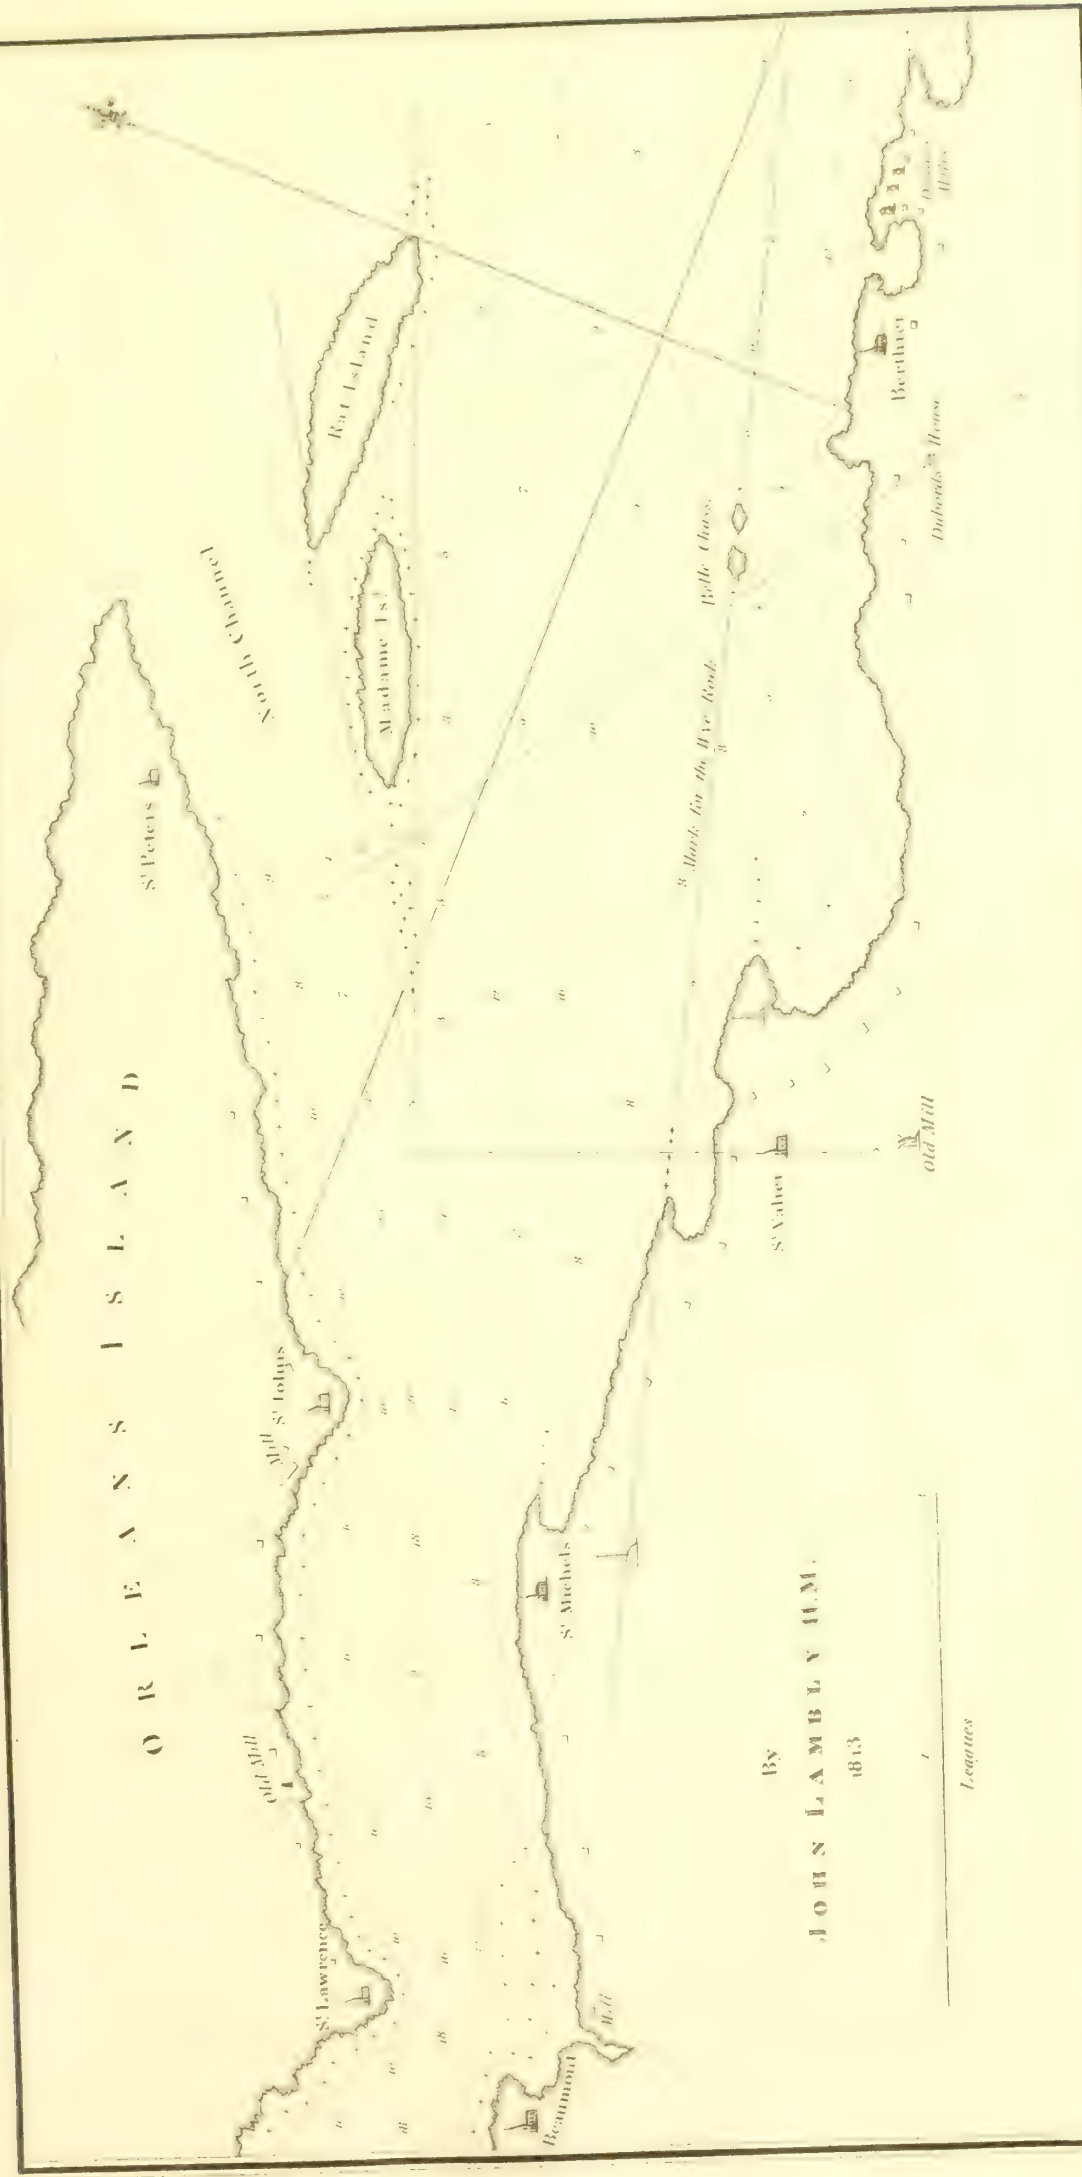

These Roofs and the two Steeples are covered with tin

Appearance of the two Steeples when on the Edge of the Bank, off the River, S<sup>t</sup> Charles  
bearing S 36° W. The Mark is from 2 to 3 miles distant.
